描述

在分类管理页面配置了商品分类后，进入商品管理页面

预期结果：分类显示与配置一致

测试结果：分类多了一个未配置

The screenshot shows the ERP system's category management interface. On the left, a sidebar lists categories: '全部' (All), '未分配' (Unassigned), '食物' (Food), '日常用品' (Daily necessities), '体育' (Sports), '家电' (Home appliances), and '护肤品' (Skincare). The '未分配' category is highlighted with a red box. The main area shows a search bar and buttons for '+ 新增' (Add) and '批量删除' (Batch delete). Below, there's a table with columns for '商品名称' (Product name) and '操作' (Action). On the right, the Chrome DevTools Network tab is open, showing a response from the 'erpProductList?pa...' endpoint. The response is a JSON object with a 'rows' array containing five items. The first item is '未分配' (Unassigned), which is also highlighted with a red box in the network log.
